

EXTERNAL EXTRACTION MACHINES

# Fast Vacuum

Very robust, fast, automatic, easy to use these are just some of the advantages of this exceptional packaging machine.

Fast Vacuum features an all-stainless steel body!

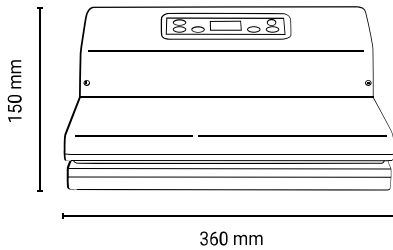

It is ideal both at home and for professional use, equipped with accessories that allow the storage of solid products, in channelled vacuum bags, as well as liquids in special containers Conserbox

The special control panel with led display allows the perfect visualization of vacuum level and the different sealing levels
